

User Guide

Home Page — index.html

Active match selection & navigation to all system pages

Active Match Selector

المباراة النشطة

-- اختر مباراة للبدء --

تأكيد الاختيار

How it works:

1. A dropdown lists all saved matches.
2. The active match is marked with ★
3. Select a match from the list.
4. Press "Confirm Selection".
5. All screens update instantly.

After pressing Confirm, a success alert appears and all display screens refresh automatically.

Navigation Buttons

شاشة العرض

Opens the main audience display

[index6.html](#)

لوحة التحكم

Tips & Notes

1

Before the match

Always confirm the correct match is selected before starting.

2

Display screen

Open the display screen on a separate monitor or projector first.

3

Switching match

You can switch the active match at any time during the event.

4

Auto-refresh

All screens (index2, index3, index6) update instantly via Firebase.

5

Star mark (★)

The currently active match is marked with ★ in the dropdown list.
